

Apprenticeship Standard - L3 Infrastructure Technician

What is this Apprenticeship about?

This Apprenticeship will help to upskill existing staff working within the sector or we can help you recruit apprentices wishing to pursue this career.

Apprentices will gain a range of skills using the latest technologies. The development of these skills allows you to evolve sleek, efficient & effective systems throughout your organisation.

Our tailored training will precisely match your needs, resulting in a well-trained, capable workforce. Delivery will be a mix of block release using our state of the art facilities & in your workplace, providing a cost effective method of training & upskilling your staff. An industry specialist Assessor will support you & your Apprentice throughout the process.

How is this Apprenticeship delivered?

On and off the job training in the workplace.

What else do I need to know?

Regular intakes throughout the year, monthly.

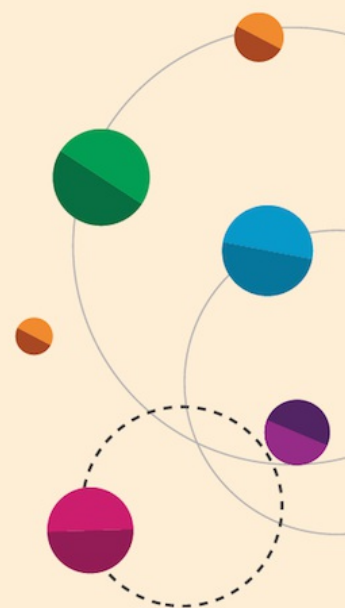

What apprentices will learn:

- maintenance processes and troubleshooting using digital tools and techniques
- how to record, analyse and present data
- problem solving and how to manage workflow
- a knowledge of cabling and connectivity
- the architecture of computer systems
- an understanding of the differences in coding and logic
- written and spoken communication skills
