

# Apprenticeship Standard - L3 Software Development Technician

## What is this Apprenticeship about?

This Apprenticeship will help to upskill existing staff working within the sector or we can help you recruit apprentices wishing to pursue this career.

Apprentices will gain a range of skills using the latest technologies. The development of these skills allows you to evolve sleek, efficient & effective systems throughout your organisation.

Our tailored training will precisely match your needs, resulting in a well-trained, capable workforce. Delivery will be a mix of block release using our state of the art facilities & in your workplace, providing a cost effective method of training & upskilling your staff. An industry specialist Assessor will support you & your Apprentice throughout the process.

## How is this Apprenticeship delivered?

On & off the job in the workplace

## What else do I need to know?

Regular intakes throughout the year, monthly

What apprentices will learn

- writing simple code for apps
- principles of good user interface design
- applying industry standards to manage code during build and release
- using basic analysis models such as using cases and process maps
- unit testing
