

Apprenticeship Standard (3) Maintenance & Operations Engineering Technician

What is this Apprenticeship about?

This Apprenticeship will help to upskill existing staff working within the sector or we can help you to recruit new Apprentices.

Maintenance & Operations Engineering Technicians take responsibility for the quality & accuracy of the work they undertake within the limits of their authority. They will be able to demonstrate a core set of behaviours in order to be competent in their job role, complement wider business strategy & development.

We will design a tailored package, precisely matched to your needs. Delivery will be a mix of workplace & at our new modern facilities, providing a cost effective method of training & upskilling your staff. An industry specialist Assessor will support you & your Apprentice throughout.

How is this Apprenticeship delivered?

On and off the job training within the workplace, with weekly day release at Stoke on Trent College

What else do I need to know?

Main intake is September, with options for mid year starts – January / April subject to numbers

A Maintenance & Operations Engineering Technician apprentice could learn skills such as:

- locate and rectify faults on plant and equipment
- comply with industry health, safety and environmental working practices and regulations
- communicate with and provide information to stakeholders in line with personal role and responsibilities
- read, understand and interpret information and work in compliance with technical specs. and supporting documentation
- prepare work areas to undertake work related activities and reinstate those areas after the completion of the work related activities
- inspect and maintain appropriate plant and equipment to meet operational requirements
- assess and test the performance and condition of plant and equipment
- communicate, handover and confirm that the appropriate engineering process has been completed to spec.
